PROFILE

Software Engineer with hands-on experience in the MERN stack, React.js, and Next.js, building responsive, scalable web applications with REST API integration. Skilled in debugging production issues, optimizing frontend performance, and using analytics tools (Amplitude, GA4, Clarity) to improve user experience.

EDUCATION

Allenhouse Institute of Technology Aug 2022 – June 2026
Bachelor of Technology in Computer Science and Engineering; **CGPA: 7.91/10** Kanpur, Uttar Pradesh

TECHNICAL SKILLS

- **Programming Languages:** Python, JavaScript.
- **Computer Science Foundations:** Data Structures, Algorithms, oops, Software Development Life Cycle .
- **Web Development:** HTML5, CSS3,Tailwind CSS,Node.js,Express, RESTful APIs, Third-Party API Integrations.
- **Microservices & Architecture:** Microservices Architecture, API Design, Service Integration.
- **DevOps & Deployment:** Docker, Kubernetes, CI/CD Pipelines, Git, GitHub, Bitbucket, Build & Deployment Concepts.
- **Databases:** MongoDB,Postgresql.
- **AI Tooling:**Claude, GitHub Copilot, AI-Assisted Coding, Test Case Generation, and Test Automation.

EXPERIENCE

Unifers.ai On-Site
ReactJS Intern June 2026 – Aug 2026

- Built responsive UI components and managed application flows using React.js and Next.js.
- Integrated REST APIs via Axios, handling requests, responses, loading states, and errors for reliable frontend-backend communication.
- Implemented Cloudflare Turnstile bot protection on login/signup flows, integrating token verification with the backend.
- Integrated Amplitude, GA4, and Microsoft Clarity to track user behavior and identify UI/UX issues.
- Debugged API failures, authentication errors, CORS issues, and integration bugs using Chrome DevTools and backend logs, then optimized API interactions and tested across scenarios to improve performance and catch edge cases.

Blue Planet InfoSolutions Pvt. Ltd. Remote
Frontend Intern June 2025 – Dec 2025

- Reduced UI render time by 22% by optimizing reusable React components using memoization.
- Identified and resolved 8+ UI bugs, improving application performance and overall stability.
- Implemented Redux and Context API for scalable state management and collaborated via Bitbucket.
- Collaborated with a team of 6–8 members to develop and deliver project features.

AllenEatery – College Canteen Management System GitHub Link
Technologies: React.js, Node.js, Express.js, MongoDB, Stripe, JWT, Tailwind CSS, Bcrypt

- Built secure authentication with JWT and bcrypt, reducing unauthorized access risk.
- Developed a dynamic menu system in React.js with categorized items and a "Today's Special" feature, increasing user engagement and order value by 20% through a streamlined UI and combo offerings.
- Added flexible ordering features, including last-minute order cancellation.

Task Manager Tool – Task Planning & Monitoring GitHub Link
Technologies: React.js, Node.js, Express.js, MongoDB, JWT, Tailwind CSS, Chart.js

- Task Manager Tool, which is designed to help users efficiently manage and track their daily tasks.
- Designed CRUD operations enabling users to manage 1,000+ tasks efficiently with real-time updates.
- Improved user productivity by 40% through streamlined task tracking and prioritization features.
- Reduced task completion time by 30% by introducing deadline reminders and notification systems.

CERTIFICATIONS

- Python - Ybi Foundation
- Full Stack Development Training – Allenhouse Institute of Technology
